(a) Please describe the difficulty of this lab.

在寫進位轉換 recursive 時我原本的幾種寫法都出現:

NoneType' object has no attribute '__getitem__'

但是我很確定裡面都不是 NoneType

(註解掉 recursive 的 function call XXX_(n-1,...)那行就可以 print 出來了)

不知道為什麼 解決不了

於是我最後直接用交電教的方法去 implement 這題

- (b) How long did you spend on this lab?
- 8個小時多吧
- (c) Anything you want to say to TA so far? (Teaching style, where to improve, to name a few)

Hi
