(a) Is this your first time writing a code? If no, please specify what kind of programming language you learned before.

我之前修過生機系的計算機程式語言　2 學分　學的是 C++

(b) Are the Python and VPython installation guidelines helpful? If not, please provide some constructive suggestions.

教學非常仔細　但我照他的做一開始不知為何打不開 vpython

(c) Is this handout clear enough? If not, please specify which part confuses you.

非常清楚明白

(d) Please give some feedbacks to the design of this lab. Positive or negative are both welcomed

我覺得應該先教基本的語法　　直接照他的打也是懵懵懂懂的不知道在幹嘛.
